

Compliance

At CSS we take compliance very seriously and as a group of companies we achieve significant competitive edge over our competition by driving business standards and processes through our QMS and ISO accreditations.

No one can overlook Health & Safety and at CSS we believe that this is everyone's responsibility and we positively encourage the reporting of near miss incidents and have an open culture of feedback and suggestions from the shop floor. Our managers are IOSH qualified and we have a highly qualified and experienced H&S manager who is the focal point for all safety and quality matters. Feedback is vital for us to ensure we continue to improve our services. We encourage our clients to accompany us on joint quality inspections and formally record results and follow-up actions.

We operate our business inline with the following accreditations:

ISO 9001—Quality Management:

This is an internationally-recognized standard for quality management, ensuring that our business has proven processes in place to meet our customer's requirements.

OHSAS 18001—Health and Safety Management Systems:

This is a UK standard which demonstrates our commitment to Occupational Health and Safety. Through this our customers can be confident that we exercise due diligence and reduce risk in our operations.

ISO 14001—Environmental Management Systems:

An internationally- recognised certificate that demonstrates to our customers that we manage our environmental duties in a responsible manner.

ISO 27001—Information Security Management Systems:

Previously known as BS7750, our customers can be confident that we manage and minimise threats to information and data. This covers issues such as viruses, hackers, printed material and back-up.
